

## TestVue™ Software Suite

Create, Run & Evolve Your Test Programs — All in One Intuitive Platform

TestVue™ is the powerful, user-friendly software engine behind Astronics Test Systems' PinPoint systems. Designed for engineers and technicians, TestVue™ lets you easily create, customize, and execute test programs through a flexible, graphical programming interface.

Whether you're conducting in-circuit diagnostics or advanced boundary scan testing, TestVue™ streamlines your workflow — from board layout to results logging.

### Always Up-to-Date.

- Supplied with your PinPoint system and licensed for the lifetime of your equipment
- Enhancements and library updates available during warranty and support periods
- Embedded on a Windows™-based industrial PC for a ready-to-use experience

### Built-In Power, Expandable by Design

#### Included as Standard:

- Test program creation and execution
- Graphic program flow editor
- Board layout visualization
- Data logging and reporting

#### Optional Add-Ons for Advanced Capability:

- **Boundary Scan (Device & Chain)** — Expand testing to modern digital components
- **Schematic Display & Netlist Capture** — Reverse engineer undocumented boards
- **Library Development** — Customize and expand your test coverage
- **C Script Integration** — Reuse or embed C-code into TestVue workflows
- **Instrument Strategizer** — Build custom instrument drivers using VISA in a graphical environment

### KEY BENEFITS

- Build & run dynamic in-circuit tests
- Perform functional edge connector tests
- Pinpoint faults down to device and track level
- Execute device and chain-level boundary scan tests
- Log, review, and export test results with full traceability
- Fast learning curve with a visual interface
- Modular design to grow with your needs
- Backed by Astronics' commitment to innovation and support
- Trusted in aerospace, defense, and industrial sectors worldwide
